

OBJECTIVES and TARGETS

Fiscal Year 2009

WASTE
REDUCTION
& DISPOSAL
DIVISION

Regulatory Compliance (Continuous Improvement)

1) **Objective:** *Be prepared to implement enhanced surface emissions program to meet new standard upon regulatory enactment.*

- **Target:** Be able to meet California Integrated Waste Management Board proposed landfill surface emissions standard of 200 ppm

- **Program:** Follow proposed California Air Resources Board rulemaking "Methane Emissions from Municipal Solid Waste Landfills" particularly the "Landfill Methane Surface Emission Limit" which includes "Instantaneous Landfill Methane Surface Monitoring Requirements" and "Record Keeping and Reporting Requirements." Identify necessary resources and methods to meet 200 ppm surface emissions standard including monitoring and record keeping at Miramar landfill.

Neg. Significant Aspect Number/s: 3, 3a

Pos. Significant Aspect Number/s: 8

Prevention of Pollution (Continuous Improvement)

2) **Objective:** *Maximize diversion of HHW batteries and fluorescent light bulbs entering the Miramar Landfill.*

- **Target:** 95% diversion of items brought to the landfill by private, self-haulers.

- **Program:** Investigate and if feasible, develop battery and light bulb screening and removal program at the fee booth in cooperation with the landfill hazardous substance enforcement team.

Negative Significant Aspect Numbers: 14, 6

Poss. Significant Aspect Number/s: 2, 2a, 2b, 2d

3) Resource Conservation (Continuous Improvement)

Objective: *Maximize recycling efforts of Navy and non-profit waste haulers*

- **Target:** 75% compliance with program within the first year.

- **Program:** Develop large customer recycling diversion program for DOD and Non-Profit organizations depositing excessive amounts of recyclable material in landfill.
